

Submission of papers

Authors should email their manuscripts as word files to the Coordinators (sandeep.nitjaipur@gmail.com/sktiwarimrec@yahoo.com)

Manuscript preparation

The manuscript should be provided in double-spaced typing on A4 size pages. It must be written in English and should not, normally, exceed 3,000 word-equivalents. The title should be concise and be followed by the name(s) and affiliation(s) of the author(s). The main body of the paper is to be preceded by an abstract of about 150 words, reporting concisely on the objectives and conclusions. The contact details of the corresponding author including telephone and fax numbers as well as email address should be provided in a footnote on the first page. Other footnotes are to be avoided. The SI system is to be used throughout and if it is necessary to quote other units then these should be added in parentheses.

The manuscript is expected to be written in correct and easily readable English. When referring to figure numbers, please use Figure in full, followed by the number. When referring to equation numbers, the word equation and equations should be abbreviated to Eqn and Eqns, respectively. Thus, one may write: "... the figure on the left relates to Eqn 32 and the figures on the right relate to Eqns 33 to 37. Eqns 38 and 39, on the other hand, relate to Figures 102 and 103, respectively. Figure 102 is seen to be similar to Figure 103(a) but the two figures have clear differences that reflect the differences in their equations..."

Symbols denoting matrices and vectors should appear in following style:

The symbols may appear enclosed in square brackets (for matrices) or curly brackets (for vectors).

References

References to published work should be referred to in the text by the last name(s) of author(s) followed by the year of publication in parentheses. For example, one may write "Chaudhary et al. (2007) referred to several existing studies (Tiwari 2005, 2006, 2007a,b; Nagpal et al. 1992; Chaudhary and Nagpal 2005)..." or "More information can be found in Ghali et al. (2002)." The references should be grouped at the end of the paper in the alphabetical order of the last name of the first author in the following style:

Chaudhary, S., Pendharkar, U., and Nagpal, A. K. (2007). "Hybrid procedure for cracking and time-dependent effects in composite frames at service load." *Journal of Structural Engineering, ASCE*, 133(2), 166-175.

Pendharkar, U., **Chaudhary, S.**, and Nagpal, A. K. (2006) "Sensitivity analysis for predicting parameters for ANN for bending moment in continuous composite beams considering concrete cracking." *Proc., Recent Advances in Computational Mechanics and Simulation, IIT Guwahati, India*,138-144.

Illustrations

The original or electronic file of each illustration must be provided with the final revised submission. Each illustration must be clearly numbered. Illustrations should be separated from the text and attached to the end of the text. Captions for the illustrations should be typed in numerical order and placed at the end of the manuscript. The illustrations should preferably require the same degree of reduction. The type area is 175mm wide and 250 mm deep, in two columns per page, each 85mm wide, and lettering should be large enough to be legible after reduction of the illustration to fit the page or column width. Hand-written lettering is not acceptable.
