Event Report Collection and Donation Drive

1. Collection and Donation Drive

Under the MoE Flagship Programs as part of the Special Campaign 5.0 observance, the National Service Scheme (NSS) Club under Cultural Society organized a comprehensive Collection & Donation Drive from 17th October to 31st October 2025. The initiative was undertaken with the central theme, "Waste for someone, Wealth for someone else," and the objective of transforming items no longer needed by the campus community into valuable resources for the underprivileged. This aligns with the NSS vision of fostering social responsibility and sustainable practices.

The fortnight-long drive witnessed the wholehearted and active participation of students, faculty, and staff across the campus. Dedicated collection points were strategically established at Prabha Bhawan, MNIT Temple, Vinodini Hostel, Aurobindo Hostel, and Acharya Bhawan to ensure maximum accessibility for all potential donors. The event was further motivated by the NSS volunteers, who actively managed the collection process and spread awareness about the profound impact of small contributions on the lives of those facing hardship.

During the drive, a wide array of items was collected, including gently used clothing, old textbooks, stationery, household items, and bags. This effort effectively demonstrated the principle of "Waste to Wealth" by diverting usable material from the waste stream and channelling it to provide direct relief and hope to vulnerable sections of society. Volunteers meticulously sorted, organized, and prepared the collected items for subsequent donation to relevant partner NGOs and charitable organizations. The Collection & Donation Drive concluded successfully, with the NSS community reaffirming its commitment to social service and collaborative humanitarian efforts. The remarkable volume of donated goods stood as a testament to the empathetic and generous spirit of the MNIT Jaipur community in promoting socio-environmental sustainability and aligning with the principles of the Ministry of Education's Special Campaign 5.0.

2. Awareness Campaign

As a focused initiative under the observance of Special Campaign 5.0, the National Service Scheme (NSS) unit of MNIT Jaipur organized an "Awareness Campaign" on 28th October 2025, dedicating three hours to collective education and social messaging across the campus. The initiative was undertaken with the objective of fostering environmental stewardship and driving practical, sustainable behavioural change among the campus community.

The campaign saw vigorous participation from NSS volunteers and enthusiastic students, who dedicated their time towards imparting key environmental and civic knowledge. The core of the awareness strategy encompassed two main facets: setting up interactive educational sessions and conducting a focused door-to-door outreach. The outreach notably included visits to Faculty Houses to engage and educate their families on responsible waste management practices.

Crucially, the outreach team ensured immediate action on the educational points by performing a practical waste collection drive from these residences. The central focus of all communication remained on promoting:

- Proper Disposal of Waste
- General Cleanliness
- Safe E-Waste Disposal
- The critical importance of the 3Rs (Reduce, Reuse, and Recycle)

The precise communication and direct engagement were highly effective, providing a strong platform to demonstrate practical waste management compliance and foster a culture of sustainability.

The Awareness Campaign concluded successfully, with the collective display of outreach efforts reflecting the true spirit of Environmental Stewardship. This demonstrated the NSS unit's dedication to underscoring the fact that achieving a cleaner future and sustainable functioning begins with widespread awareness and dedicated commitment to responsible disposal practices.

3. Cleanliness Drive

As a dedicated effort towards maintaining community and environmental hygiene under the theme of Special Campaign 5.0, the National Service Scheme (NSS) unit of MNIT Jaipur organized a focused "Cleanliness Drive" on 29th October 2025. The volunteers collectively dedicated four hours to preserving the natural beauty and ecological health of Smriti Van.

The drive saw enthusiastic participation from dedicated NSS volunteers and students. The collective effort was strategically focused on the vulnerable and high-traffic areas within the Smriti Van. The main activities concentrated on the systematic removal of accumulated plastic waste and general litter, coupled with light maintenance of walking paths and common areas. This comprehensive approach was essential to restore the area's natural appeal and ensure it continues to remain a pristine green lung for the city.

The commitment demonstrated during the cleaning activity provided a tangible example of responsible citizenship and direct action against environmental pollution. By physically clearing the area of waste, the volunteers reinforced the practical application of environmental principles taught during the earlier Awareness Campaign.

This initiative successfully highlighted the collective responsibility for shared public spaces and environmental preservation. The effort reflected the true spirit of Community Dedication, underscoring that safeguarding our green environments requires consistent effort and active participation from every member of society. The success of the drive contributes significantly to the national mandate for cleanliness and sustainability.

4. Design for Sustainability - Workshop

To conclude the month-long observance of **Special Campaign 5.0**, the **National Service Scheme (NSS) unit of MNIT Jaipur** organized a crucial "**Design for Sustainability Workshop**" on 31st October 2025. This specialized event aimed to move beyond mere cleanup and awareness, focusing instead on integrating sustainable thinking into the core process of design and technology development, a vital step towards self-reliant and eco-conscious engineering solutions.

The workshop witnessed enthusiastic participation from a diverse group of students, researchers, and faculty members. The session was strategically structured to equip participants with the knowledge and tools necessary to approach their academic projects and daily lives through a sustainability lens.

Key areas covered during the workshop included:

- a. **Circular Economy Principles:** Discussions on how to move away from the linear "take-make-dispose" model toward systems that maximize resource utility.
- b. **Eco-Design and Material Selection:** Focusing on choosing environmentally friendly materials and designing products for durability, repairability, and end-of-life recycling.
- c. **E-Waste Management:** Highlighting the urgent need for safe and systematic disposal and repurposing of electronic waste, a central theme of Special Campaign 5.0.
- d. **Sustainable Innovation:** Exploring how technology and design thinking can solve environmental challenges at a grassroots level.

The workshop featured interactive sessions and case studies, encouraging participants to develop prototypes and concepts that minimize environmental impact. The initiative successfully served as a platform to embed a sense of **proactive environmental responsibility** within the technical skill set of the MNIT community.

The successful organization of the "**Design for Sustainability Workshop**" reinforced the NSS unit's commitment to not only clean the environment but also to cultivate intellectual solutions for long-term sustainability, thereby culminating the comprehensive objectives of the Special Campaign 5.0.
